Distance offshore along the section (m); window position differs per reef, horizontal scale = plan scale
reef (colour as plan)
natural seabed
tide range (spring or great diurnal / annual, see Table)
MSL
C crest depth (m)
T toe bed depth (m)
G gap = T − C (m)
depths below MSL;
C < 0: above MSL
Symbol before each name: surf outcome (shape); colour = reef
works
works rarely
mixed / disputed
does not work
unknown (hollow)
