
Spearman rank correlation with outcome:
built reefs: $\rho = 0.72$, $p_{perm} = 0.021$ (n = 10)
incl. Burkitts*: $\rho = 0.43$, $p_{perm} = 0.206$ (n = 11)
modelled volume: $\rho = 0.93$, $p_{perm} = 0.005$ (n = 8)

* Burkitts: natural reef reshaped (about 300 m^3 of rock moved)

stated volume (source) volume of the 3D model
