Metadata for Tidal Data Exchange

Station Name Corkhill Landing tides

Date of Supply Thursday, 4 June 2026

Identification ANTT: 62230		
Station Number	62230	
Name	Fremantle Ports Corkhill Landing radar gauge	
Latitude and Estimated Positional Uncertainty	32° 3.17' S	+/- 5m
Longitude and Estimated Positional Uncertainty	115° 44.50' E	+/- 5m
Map Name	RAN AUS 112	
Map Number	GDA2020 Zone 50	
Map Grid Northing	6452923	
Map Grid Easting	381096	
Type of Readings		
Heights Streams Streams Constituent constants (Delete those not applicable)	Observations	
Progress *		
Update Frequency *	Real Time	
Available Format Type *	DIGITAL, text	
Measurement Units		
Tidal Heights Tidal Streams (Delete those not applicable)	Metres	
Reference Frame		
Time Zone Vertical Reference Frame TGBM Name/Number TGBM Elevation relative to the vertical reference Estimated Positional Uncertainty Horizontal Reference Frame Direction of Stream Readings Depth of Stream Readings (relative to Vertical Reference Frame) Estimated Positional Uncertainty	UTC+8 Fremantle Low Water Datum (LWD) Fremantle 53A 3.088 m above Fremantle LWD（CD) World Geodetic System (WGS84)	
Search Words *	Marine, Oceanography, Water,	
Data Owner Details		
Name	Fremantle Ports	
Postal Address	1 Cliff St Fremantle	
Street Address		
Telephone	9430 3555	
Facsimile		
Email	mail@fremantleports.com.au	
Internet	http://www.fremantleports.com.au/Pages/default.aspx	
Contact Officer Details		
Name	Harbour Masters Office	
Position	Port Hydrographer	
Telephone	9430 3392	
Email	Harbourmaster@fremantleports.com.au

Station Name Corkhill Landing tides

Date of Supply Thursday, 4 June 2026

Data Custodian Details	
Name	Bureau of Meteorology
Postal Address	GPO Box 1289, Melbourne VIC 3001
Street Address	700 Collins Street, Docklands, VIC 3008
Telephone	
Facsimile	
Email	tides@bom.gov.au
Internet	www.bom.gov.au/oceanography
Contact Officer Details	
Name	
Position	Tidal Services
Telephone	
Email	tides@bom.gov.au
Details of the Readings Provided Herewith	
Date of readings supplied	
From	01/01/2021
To	
The time interval between readings (If the readings are for high & low water then enter "Zero")	5 minutes
Are the readings averaged or filtered	5 minute average
Are there any access constraints (such as commercial-in-confidence or constraint on the use or distribution to third parties).	No
Objective Quality Assessment of Tidal Observations (Height or Stream)	
Instrument	
Type Make Model	Radar
Sensor	
Type Make Model Mode of operation	WLR 8
Frequency of System Calibrations Field calibration and Laboratory calibration	Yearly
Frequency of Water Level Checks	Optical Levelling
Estimate of the Precision of the Water Level Checks Time (Std Dev in Minutes) Height (Std Dev in metres)	
System Resolution	
Estimated Local Uncertainty	
Status of the Readings	
Description of the validation process including a statement detailing how:- 1. The instrumental biases were treated 2. Outliers were selected and dealt with 3. Breaks in the record were dealt with	
Date of Validation	

Metadata for Tidal Data Exchange

Station Name Corkhill Landing tides

Date of Supply Thursday, 4 June 2026

Name of Person certifying the validation	
Details required with the supply of tidal constituent constants	
All of the details required above	
The name and version of the software used to calculate the constants	TANS
The tidal constituent model used (particularly noting the treatment of the constituents Sa and Ssa) and specifying any related (inferred) constituent constants	Doodson's method
The date span used to prepare the constituent constants	
The reference time zone for the constituents	WAST
The vertical datum to which the constituents apply	Fremantle LWD (CD)
A precision estimate of predictions based on the constituent constants (for example, standard deviation of the analysis residuals)	Standard Deviation of Residuals for 2024 predictions is 0.15 m
Additional details required with the supply of tidal predictions	
All of the details required above	
A statement describing the tidal prediction process used	Doodson's method
The name and version of the software used to calculate the predictions	Tipp4
A list of the constituent constants used or if the list is not provided, the donor agency's identifier of the list	Standard 112 Constituent list

Comments on data by Port Authority

Fremantle Ports Inner Harbour Corkhill Landing radar gauge is owned and operated by Fremantle Ports.

Primary gauge
Inner Harbour Corkhill Landing tide gauge from 19 Dec 2020 onwards
Previously Fremantle Ports A Shed tide gauge (32° 3.35' S, 115° 44.37' E)
